

Product Data Sheet

Xpert-60 Hologram Remover

500ml/16.9fl.oz
Code: XP-90013

SINCE
1987

Ultimate Anti-Hologram Treatment

- Specially formulated ultra-fine compound for removal of light swirl marks & holograms from all paint types.
- Ultimate solution for fast & efficient removal of holograms from darker colours.
- Combine with Xpert-60 Black Finishing Foam to ensure enhanced clarity/depth of gloss and a mirror-finish shine.

Directions for Use (Machine):

Ensure paint is clean & free from dust. Cool hot surfaces first if working in direct sunlight. Shake container before use.

For removal of scratches/deeper marks use Xpert-60 Scratch Remover before final finishing.

Apply Hologram Remover to paint surface and spread to a thin even layer using a pad. Set machine speed to 800-1500 rpm (free running), polish up paint surface reducing pressure as film starts to clear. Continue to polish surface with un-pressured pad then remove any residues with Xpert-60 Microfibre Detailing Cloth. Repeat process as required.
